DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 1751

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-21 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rattinger et al (5,965,501) or Rattinger et al (6,174,845).

Rattinger et al '501 or '845 disclose a personal washing bar composition comprising an emollient rich phase or stripe. Specifically, said bar comprises 40-99% by weight of surfactants; 1-60% by weight of an emollient stripe composition comprising 20-80% by weight of a polyalkylene glycol; 5 to 40% by weight of a benefit agent; 0.01 to 30% by weight of a thickening agent; 0 to 10% by weight of water and 0 to 15% by weight of fillers and structurants (see col. 2, lines 45-60 and col. 2, lines 45-63, respectively). Moreover, Rattinger et al '501 or '845 teach the viscosity and specific emollient/benefit agents required in said bar compositions (see col. 3-col. 4, respectively). Note, see examples and claims.

As this reference teaches all of the instantly required it is considered anticipatory.

Alternatively, Rattinger et al '501 or '845 are silent with respect to dispensing and applying said compositions and packaging said compositions.

It would have been inherent to one of ordinary skill in the art to dispense said bars to be applied to the human body since said bars are taught for personal use and further one of ordinary skill would reasonably assume that said bars are packaged for product distribution and for economical access, absent a showing to the contrary.

Double Patenting

6. Claims 1-21 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-23 and 1-22 of copending Application No. 10/837,201 and 10/836,984, respectively. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: striped personal cleansing composition with separate benefit and cleansing phases.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
